

Rukhshan Arif Mian

rukhsanarifm@gmail.com | +923064788721 | Lahore, Pakistan

Analytical lead with 6+ years turning data into decisions across the public, non-profit, and private sectors. I build the full stack: pipelines, dashboards, and increasingly AI agents that let non-technical teams answer their own questions in minutes. Hands-on with SQL, Python, BigQuery, and Claude-based automation, with a track record of work that has informed key business and policy decisions.

EDUCATION

M.S., Computational Analysis and Public Policy , University of Chicago	2021
B.S., Economics , Lahore University of Management Sciences (LUMS)	2018

EXPERIENCE

Independent Data & Analytics Consultant <i>Self-Employed, Lahore</i>	Jul 2025 – Present
- Built an internal analytics agent (Claude Code + BigQuery) that converts stakeholders' natural-language questions into validated reports and charts, cutting turnaround from 2+ days to under 10 minutes. - Designed a plan-approval and validation workflow so every analysis is consistent, reproducible, and saved as versioned queries and outputs. - Built product analytics pipelines (BigQuery, Python) and KPI dashboards for an ed-tech startup, tracking user funnels across 5K+ learners. - Leading data management for a Randomized Controlled Trial evaluating a WhatsApp-based English reading tool's impact on foundational literacy among 2,000 primary students in Pakistan. - Collaborated with the London School of Economics (LSE) to build data pipelines (Python) and dashboards for monitoring Pakistan's Economic Reform Roadmaps, focusing on energy-sector metrics such as T&D losses and recovery rates. Presented data solutions to junior and senior ministers, the Prime Minister's Office, and the British High Commission.	
Data & Strategy Analyst <i>Waseela, Lahore</i>	Jun 2025 – Oct 2025
- Built analytical pipelines and 4 executive dashboards covering pricing, inventory, and demand that informed \$4M+ in annual revenue decisions. Created a demand forecasting dashboard tracking \$500K+ in stock across 11 warehouses. - Led collaboration across 4 departments (Business, Product, Operations, Data), aligning teams on shared KPIs and ensuring analytical outputs served each function. - Developed reusable data models that cut ad-hoc query time by 60%. Translated performance metrics into executive narratives for C-suite stakeholders on a weekly basis.	
Data Engineering Consultant <i>Johns Hopkins University, Remote</i>	Jul 2023 – Feb 2025
- Built ETL pipelines processing 6M+ observations from 12 sources, achieving 80% faster processing. Reduced downstream data prep time by 75% for regression, geospatial, and dashboard workflows (Python, PostgreSQL). - Designed automated daily reports covering demographic, economic, and health indicators for 100 U.S. cities using Python, AWS, and GitHub Actions.	
Associate Research Scientist <i>The Coleridge Initiative, New York</i>	Jul 2021 – Jun 2023
- Applied clustering and statistical modelling to 100K+ workforce records, engineering 20+ predictive features that improved dataset linkage accuracy by 25%. - Coached 30+ public sector officials across 5 training sessions on SQL, data analysis, and ML. Post-training evaluations showed measurable increases in tool adoption across participating agencies.	
Data Assistant Research Assistant <i>UChicago / CERP, Chicago & Lahore</i>	Jul 2018 – Jun 2021
- Analyzed 7TB of health insurance claims (MS-SQL, Stata) and automated reporting workflows, cutting turnaround by 50%. Designed 10 survey instruments and trained 18+ field researchers for an RCT. - Led technical hiring for research assistant positions across 2 recruitment cycles, defining role requirements, designing assessments, and evaluating candidates.	

TECHNICAL SKILLS

- Programming & Data Analysis:** Python (Pandas, NumPy), R, Stata, Excel, Apps Script, Google Sheets
- Dashboarding:** Tableau, Looker Studio, Metabase, React (analytics dashboards)
- Data Engineering:** ETL pipelines, BigQuery, PostgreSQL, AWS Redshift, GCP, AWS
- Automation & Orchestration:** GitHub Actions, Airflow, Claude-based agentic workflows, Zapier, AirTable
